

**SAS-500-7**

Example Picture

The item change depending by the configuration requested

# Solar Array Simulator up to 7 section

## Features (each section)

- Output range (adjustable)**     45V (Higher voltages on request)
- Output Current (adjustable)**     0-2; 0-8Amp
- Output power**     100W or 400W per section
- Adjustable I/V curve**     voltage trip point and current gain
- Remote control**     Ethernet
- Current setting**     16bit
- Current reading accuracy**     16 bit
- Current meter with cell selector on panel (on request)**
- Regulation accuracy**
  - Corrent : < 5% (set Value)
  - Voltage: 1% set value

Power supply : 220VAC 50hz
